About MarketScout

MarketScout was founded in 2000 based upon the idea that independent retail agents would benefit from an electronic insurance exchange which would connect them to multiple admitted and non admitted markets, all organized according to their particular expertise. Agents would be granted access free of charge. Today, MarketScout continues to manage the insurance exchange at www.marketscout.com. Fifty insurance companies and 35,000 insurance professionals across the United States participate in the MarketScout Exchange.

MarketScout is licensed for and facilitates placement of all lines of property, casualty, life and health business on an admitted or non admitted basis in 50 states.
